## **U**RGENT: REFERENCE LIBRARIANS! PLEASE NOTE!

**T**he CINAHL Subject Headings, Part A, is the first of three volumes in the 1992 **Cumulative Index to Nursing & Allied Health Literature (CINAHL)**. Parts B and C containing the Subject and Author Sections (including new books and dissertations) will be delivered in the spring of 1993 and will complete the annual cumulation.

**T**his specially bound CINAHL volume is part of the effort to keep costs from escalating. We are pleased to pass on this enhanced thesaurus with *over 500* new headings for 1992!

*To order softbound copies of the thesaurus or our new Database Search Guide,  
see the enclosed flyer.*

# PREFACE

---

# INTRODUCTION

---

The CINAHL Subject Heading List contains all the terms currently used to provide subject access in the CUMULATIVE INDEX TO NURSING & ALLIED HEALTH LITERATURE and the NURSING & ALLIED HEALTH (CINAHL) database.

The National Library of Medicine's Medical Subject Headings (also known as MeSH) was used as the model for the CINAHL thesaurus. Like MeSH, the CINAHL list organizes index terms in three separate sections — an alphabetic list, a tree structure or hierarchical list, and a permuted list.

More than 6,400 CINAHL subject headings provide direct, specific access to the literature of nursing and allied health. Annual updates to the Subject Heading List maintain its currency and relevancy.

Recognizing the authoritativeness of NLM's vocabulary, CINAHL accepts Medical Subject Headings as the standard thesaurus for diseases, drug names, and anatomical/physiological concepts. Nearly all CINAHL headings in those areas follow MeSH. Overall, approximately 70% of CINAHL headings are also MeSH terms. However, CINAHL supplements these terms with 2,000+ unique headings designed specifically for nurses and allied health professionals. This blending of MeSH and CINAHL is intended to provide researchers with the best of both worlds — the familiarity and consistency of a standard terminology, and the strong subject orientation of a specialized thesaurus.

Adopting the tree structure format developed by the National Library of Medicine for MeSH enhanced the power of the CINAHL thesaurus for database searching. The hierarchical structure of the "trees" identifies broader and narrower headings and allows searchers to "explode" multiple related

headings with a single command. In order to facilitate cross-database searching, CINAHL has used MeSH tree numbers where possible, and identified unique numbers with a dollar sign (\$).

The addition of the "Permuted List" in 1990 makes it even easier to locate relevant subject terms. This list is an alphabetic index of all significant terms appearing in a CINAHL subject heading or cross reference.

CINAHL's goal for 1992 and beyond is to make the thesaurus as user-friendly as possible. Toward this end, numerous term definitions and indexing guidelines have been added. Once again, CINAHL is greatly indebted to the National Library of Medicine. Many of the definitions for MeSH terms have been derived from scope notes originally appearing in the MeSH vocabulary file.

Database searchers are also well served by CINAHL's thesaurus revision policy. Each revised heading is automatically mapped from the deleted term to the new term at the beginning of the indexing year. History notes in the thesaurus alert users to the fact that the new terms are searchable electronically for past years.

CINAHL's editorial team is committed to the development of a thesaurus that accurately and comprehensively reflects the literature of nursing and allied health. Obviously, this is a never-ending task. Every year the editorial committee reviews hundreds of suggestions for new headings, cross references, and scope notes. Many of these suggestions come from users of the print index or electronic database. We very much appreciate this feedback, and hope you will work with us on an ongoing basis to make the CINAHL Subject Heading List the best it can be.

# ALPHABETIC LIST

The *Alphabetic List* contains all CINAHL subject headings and their cross references arranged in alphabetical order. Citations will be found in the subject section of CINAHL only under the headings that appear in large type. All other entries are cross references leading the user to authorized CINAHL headings.

Cross references are of two types:

- 1) *See* references refer from terms not used to valid CINAHL headings. In most cases, the term referred from is synonymous to the preferred term. The references appear in lower case and the preferred CINAHL term in upper case, e.g.,

Bonding, Parent-Infant *see* **PARENT-INFANT BONDING**

The "x" symbol listed under a valid CINAHL heading indicates a backwards see reference, e.g.,

**PARENT-INFANT BONDING**  
x Bonding, Parent-Infant

- 2) *See also* references indicate related CINAHL headings which generally do not appear in the same tree, e.g.,

**HOSPITALIZATION**  
*see also* CHILD, HOSPITALIZED

The "XX" symbol indicates a backwards see also reference, e.g.,

**CHILD, HOSPITALIZED**  
XX HOSPITALIZATION

Each heading is followed by one or more alphanumeric codes (tree numbers) which direct the user to the place(s) in the *Tree Structures* where the term is to be found. A dollar sign (\$) preceding the tree number indicates either that the heading does not also appear in Medical Subject Headings (MeSH) or that it appears in a different position within the MeSH tree structures. A plus sign (+) following the tree number indicates that there are additional terms indented under that heading in the *Tree Structures*.

Three different types of notes may appear in the thesaurus record:

- 1) The date identifies what year a term was added as a subject heading.
- 2) The history note explains where to find information on that topic in previous years.
- 3) The scope note provides a brief definition of the heading and/or explains the use of subheadings.

The following is a complete sample entry from the *Alphabetic List*:

## **WARMING TECHNIQUES**

\$E2.990

Year: 1992

Techniques used to prevent or treat loss of body heat. They may include warming intravenous fluids and irrigation solutions to body temperature, heating bed linens, warming and humidifying anesthetic gases, protecting the body surface from exposure to air currents, etc.

Searchable electronically since 1983.

x Body Warming Techniques  
x Rewarming Techniques  
XX HYPOTHERMIA

# TREE STRUCTURES

The *Tree Structures* list all the CINAHL headings in a subject hierarchy. The trees are composed of 16 broad categories (e.g., Category A = Anatomy) most of which are divided further into subcategories (e.g., Subcategory A7 = Anatomy-Cardiovascular System). The CINAHL terms in each subcategory are arranged hierarchically according to their alphanumeric codes (tree numbers) from the most general to the most specific. Each CINAHL term appears in at least one place in the trees and may appear in as many additional places as are logically appropriate.

CINAHL indexers routinely use the most specific headings available to represent indexable concepts. For example, articles on nurse practitioners working with the elderly will be indexed only under the specific heading GERONTOLOGIC NURSE PRACTITIONERS. They will *not* also appear under the general term NURSE PRACTITIONERS. The CINAHL user who neglects to look up the heading NURSE PRACTITIONERS in the trees may easily miss the more specific, relevant headings indented underneath it.

CINAHL has made limited see also references between headings that appear in the same tree, consequently

examination of the *Tree Structures* is the most accurate way to identify many specific headings of interest. Any CINAHL heading that has been assigned a tree number followed by a plus sign (+) should be looked up in the trees since there will be specific headings indented beneath it. CINAHL users may also consult the trees to find additional subject headings that express related concepts whether at the same level, or at higher or lower levels of specificity.

In the *Tree Structures*, each term is followed by a number that indicates its position in the hierarchy. It may also be followed by one or more additional numbers in smaller type that indicate other tree locations for the same heading. These cross reference tree numbers are truncated to the third level.

The trees also contain some terms that are designated (NON-CINAHL). These are included solely for the purpose of clarifying the logical structure of the tree. They are *never* used for indexing and do not appear in the subject section of CINAHL.

The following is a sample section from the *Tree Structures*:

## N2 — HEALTH CARE — FACILITIES, MANPOWER AND SERVICES

NURSES	\$N2.350.645.630+	M1.526.485	
ASSOCIATE DEGREE NURSES	\$N2.350.645.630.10	M1.526.485

NURSE MANAGERS	\$N2.350.645.630.335+	M1.526.485	
CHARGE NURSES	\$N2.350.645.630.335.250	M1.526.485	
HEAD NURSES	\$N2.350.645.630.335.450	M1.526.485	
NURSE MIDWIVES	\$N2.350.645.630.350	M1.526.485	
NURSE PRACTITIONERS	\$N2.350.645.630.487+	M1.526.485	
ADULT NURSE PRACTITIONERS	\$N2.350.645.630.487.115	M1.526.485	
FAMILY NURSE PRACTITIONERS	\$N2.350.645.630.487.305	M1.526.485	
GERONTOLOGIC NURSE PRACTITIONERS	\$N2.350.645.630.487.415	M1.526.485	
PEDIATRIC NURSE PRACTITIONERS	\$N2.350.645.630.487.630	M1.526.485	

# PERMUTED LIST

---

The *Permuted List* is an alphabetic index of every significant term appearing in a CINAHL subject heading or cross reference. Indented under each entry term is a list of all of the subject headings and cross references which include that term, e.g.,

## **NURSE**

**ADULT NURSE PRACTITIONERS**

Anesthetists, **Nurse** *see* **NURSE ANESTHETISTS**

**CLINICAL NURSE SPECIALISTS**

**FAMILY NURSE PRACTITIONERS**

**GERONTOLOGIC NURSE PRACTITIONERS**

**NURSE ADMINISTRATORS**

**NURSE ANESTHETISTS**

**Nurse Clinicians** *see* **CLINICAL NURSE SPECIALISTS**

Each segment of a hyphenated term is normally considered as one word. For example, the heading EDUCATION, POST-RN is listed under both POST and RN as well as EDUCATION. However, a few exceptions have been made for terms in which one segment is meaningless without the other, e.g. X-RAYS. Non-significant terms — articles, conjunctions, some prepositions — are not entries. Single letters, Arabic numbers, and Roman numerals are included, however. Entry terms are listed in alphabetical order with Arabic numbers at the end.

The *Permuted List* has a variety of uses:

- 1) A searcher can locate the appropriate main heading when only one word of the heading is known. For example, the entry term Chemolysis will lead the user to INTERVERTEBRAL DISK CHEMOLYSIS, the authorized CINAHL heading.
- 2) It provides a link between headings and cross references which might be related but which do not necessarily appear together in either the alphabetic or tree structure list. For example, under the entry term INFANT, one finds such potentially useful headings as PARENT-INFANT BONDING; INFANT, HIGH RISK; and SUDDEN INFANT DEATH. No relationship between these terms is suggested elsewhere in the thesaurus.
- 3) It displays headings which would be retrieved when doing a text word search in the CINAHL database, and thus allows searchers to identify potential "false drops." For example, a searcher using the term "ventilation" to find articles on mechanical ventilation might be unpleasantly surprised to retrieve information on MIDDLE EAR VENTILATION. Judicious use of the *Permuted List* can help to prevent the retrieval of irrelevant citations.

# SUBHEADINGS

## TOPICAL SUBHEADINGS

There are 50 topical subheadings (or secondary headings) that can be linked to CINAHL main headings to increase the specificity of indexing. These subheadings help to group together articles on a particular aspect of a topic. Not all subheadings can be used with all main headings; for example, the subheading /prevention and control is meaningless linked to the main heading NURSING PROTOCOLS. The subcategories of main headings with which a particular subheading can be combined are identified in parentheses in the list that follows. Unless otherwise indicated, subheadings were established prior to 1983.

**ABNORMALITIES (83)** - Used with organs for congenital defects. (A not A10-12, A16)

**ADMINISTRATION** - Used for administrative structure and management. (I2, L, N2-4)

**ADMINISTRATION AND DOSAGE** - Used with drugs for dosage forms, routes of administration, frequency and duration of administration, quantity of medication, and the effects of these factors. (B6, D)

**ADVERSE EFFECTS** - Used with drugs, chemicals, plants, and manufactured products for undesirable reactions occurring in normal usage or accepted dosage. Also used for adverse effects or complications of diagnostic, therapeutic, anesthetic, surgical, or other procedures. (B6, D, E, F1, F4, G3, H, I3, J)

**ANALOGS AND DERIVATIVES (92)** - Used with drugs and chemicals for substances that share the same parent molecule or have similar electronic structures but differ by the addition or substitution of other atoms or molecules. It is used when the specific chemical heading is not available. (D3-7, D11, D14-18, D20-23)

**ANALYSIS** - Used for the identification or quantitative determination of a substance or its constituents. Includes urinalysis, blood analysis, and cerebrospinal fluid analysis as well as the chemistry or chemical composition of an organ or drug. (A, B not B2, C4, D, G3, J)

**ANATOMY AND HISTOLOGY (83)** - Used with organs, regions, and tissues for normal descriptive anatomy and histology. (A not A11-12)

**ANTAGONISTS AND INHIBITORS (85)** - Used with chemicals, drugs, and endogenous substances to indicate substances or agents which counteract their biological effects by any mechanism. (D)

**CHEMICALLY INDUCED (83)** - Used for diseases, syndromes, abnormalities, or symptoms caused by chemical compounds. (C, F3)

**CLASSIFICATION (83)** - Used for taxonomic or other systematic or hierarchical classification systems. (B-N)

**COMPLICATIONS (83)** - Used with diseases to indicate conditions that co-exist or follow. (C, F3)

**DIAGNOSIS** - Used for all aspects of diagnosis and assessment, including physical examination and prognosis. Excludes screening for which /prevention and control is used. The subheading /radiography is used for radiographic diagnosis. (C, F3)

**DIAGNOSTIC USE (92)** - Used with chemical compounds, drugs, and physical agents for the diagnosis of disease. (B6, D, H)

**DIET THERAPY (83)** - Used with disease headings for dietary or nutritional management. (C, F3)

**DRUG EFFECTS (83)** - Used with organs, regions, tissues, or organisms and physiological and psychological processes for the effects of drugs. Used with the D tree for endogenous substances only. (A, B not B2, D, F1-2, G4-11)

**DRUG THERAPY** - Used with disease headings for the treatment and prevention of disease by the administration of drugs or chemicals. (C, F3)

**ECONOMICS (83)** - Used for the economic aspects of any subject, including all aspects of financial management and fund raising. (C, E, F3-4, G1-3, I, J, L, N2-4)

**EDUCATION** - Used for education and training in various disciplines and of various classes of persons. Prefer use with disciplines. (C, E-N)

**EPIDEMIOLOGY (91)** - Used with diseases for distribution of disease and attributes of disease in defined populations; includes incidence, frequency, prevalence, endemic and epidemic outbreaks. (C, F1, F3)

**EQUIPMENT AND SUPPLIES** - Used with diagnostic or therapeutic procedures or specialties/disciplines for the development, utilization, or modification of apparatus, instruments, or equipment. (E not E7, F2, F4, G1-3, H, J, L)

**ETIOLOGY (83)** - Used with medical and social problems for causation. Includes environmental factors, microorganisms, life style, etc. Also used with nursing diagnoses. (C, F3, G3, I1, P)

**EVALUATION** - Used with non-disease headings (e.g., behavior mechanisms, physiological processes, programs, disciplines, classes of persons, facilities, and services) for evaluation and assessment. (E, F, G2-12, H-J, L-N, P)

**FAMILIAL AND GENETIC (90)** - Used for discussion of genetic basis of disease; diseases occurring in family groups due to environmental factors, including infection and common dietary habits; includes hereditary disease. (C, F1, F3)

**HISTORY** - Used for the historical aspects of any subject. (B6, C-F, G1-3, H-N)

**INJURIES** - Used with anatomic headings for wounds and injuries. (A1-10, A13-15)

**LEGISLATION AND JURISPRUDENCE** - Used for laws, statutes, ordinances, government regulations, legal controversy, and court decisions. (B6, C-F, G1-3, H-J, L-N)

**MANPOWER (83)** - Used with disciplines and programs for the demand, supply, distribution, recruitment, and use of personnel. (F4, G1-2, H-J, L, N2-4)

**METABOLISM (92)** - Used with organs, cells, organisms, and diseases for biochemical changes and metabolism. It is also used with drugs and chemicals for catabolic changes. (A2-16, B-D, F3)

**METHODS (83)** - Used with technics, procedures, and programs for methods. (E not E7, F2, F4, G1-3, H-J, L, N)

**NURSING (84)** - Used with diseases and certain physiological processes for nursing care and techniques. Includes the nursing role in diagnostic, therapeutic, and preventive procedures. (C, E, F1, F3, G8)

**ORGANIZATIONS (83)** - Used with disciplines and classes of persons for associated organizations, societies, agencies, etc. Prefer use with disciplines. (C, E, G2, H, I1-2, K-M, N2)

**PHARMACODYNAMICS (87)** - Used with drugs and exogenously administered chemical substances for their actions on tissues and organisms; includes effects upon metabolism, acceleration or inhibition of biological processes, and the mechanisms of action. (B6, D)

**PHYSIOLOGY** - Used with organs, tissues and cells for their normal function. Also used with physical processes and biochemical substances, endogenously produced, for their physiological role. (A, B, D, G7-11)

**PHYSIOPATHOLOGY** - Used with organs, tissues, cell structures, and disease states for disordered function. (A, C, F3)

**POISONING (84)** - Used with drugs, chemicals, plants, and industrial materials for human or animal poisoning, acute or chronic, whether the poisoning is accidental, occupational, suicidal, by medication error, or by environmental exposure. (B6, D, J)

**PREVENTION AND CONTROL (83)** - Used with disease headings for increasing disease resistance, control of

transmission agents, prevention and control of environmental hazards, and prevention and control of social factors leading to disease. Includes immunization and screening. (C, F1, F3, G3, I1)

**PSYCHOSOCIAL FACTORS (83)** - Used with diseases, psychological processes, techniques, and named groups for psychological, psychiatric, psychosomatic, social, behavioral, and emotional aspects. (C, E not E7, F3, G, I, M, N1-2)

**RADIATION EFFECTS (92)** - Used for the effects of ionizing and nonionizing radiation upon organisms, organs, tissues, and physiologic processes. It includes the effects of irradiation on drugs and chemicals. (A, B1, B3-6, D, G4-12)

**RADIOGRAPHY (83)** - Used with organs, regions, and diseases for x-ray examinations. Includes radionuclide imaging, angiography, and x-ray tomography. Use for radiographic diagnosis. For magnetic resonance imaging use /diagnosis; for ultrasonic diagnosis use /ultrasonography. (A, C)

**RADIOTHERAPY (83)** - Used with disease headings for the therapeutic use of ionizing radiation. (C)

**REHABILITATION (83)** - Used with disease headings and surgical procedures for restoration of function of the individual. (C, E4, F3)

**STANDARDS (83)** - Used with facilities, personnel, programs, and services for the development, testing, and application of standards of adequacy or acceptable performance. Used with chemicals or drugs for standards of identification, quality, and potency. Includes health or safety standards in industries or occupations. (D-E, F4, G-J, L, N)

**SURGERY (83)** - Used for operative procedures on organs, regions, or tissues for the treatment of disease. (A, C, F3)

**THERAPEUTIC USE (84)** - Used with drugs, biological preparations, plants, and physical agents for their use in the prophylaxis and treatment of disease. (B6, D, H)

**THERAPY (83)** - Used with diseases for therapies other than specific drug therapy, diet therapy, radiotherapy, rehabilitation, or surgery for which subheadings exist. Also used for material dealing with multiple therapies. (C, F3)

**TRANSMISSION (87)** - Used with diseases and microbes for mode of transmission. (B3-4, C)

**TRANSPLANTATION (83)** - Used with organs, tissues, or cells for transplantation. (A)

**TRENDS (83)** - Used for the manner in which a subject changes with time, whether past, present, or future. (C, E, F3-4, G1-3, H-J, L, N)

**ULTRASONOGRAPHY (92)** - Used with organs and regions for ultrasonic imaging and with diseases for ultrasonic diagnosis. Does not include ultrasonic therapy. (A, C, F3)

**UTILIZATION (83)** - Used with equipment, programs, facilities, and services for discussions of how and how much they are used. (E, F4, G1-3, H-J, L, N, P)

## TERTIARY HEADINGS

A second group of subheadings is called tertiary headings. They are distinguished from the topical subheadings (or secondary headings) in two ways. First, they can either be linked directly to a CINAHL main heading OR they can be linked to the end of a main heading/topical subheading combination. For example:

REHABILITATION NURSING/Great Britain or  
REHABILITATION NURSING/Education/Great Britain.

And second, they can be used in combination with any CINAHL main heading as appropriate.

These tertiary headings fall into two basic subcategories — age groups and geographic headings. Age group exceptions /in pregnancy and /in utero function like other age group headings.

## AGE GROUPS

**IN ADOLESCENCE** - Used for occurrence during adolescence, 13 to 18 years.

**IN ADULTHOOD** - Used for occurrence during adulthood, 19-44 years.

**IN INFANCY AND CHILDHOOD** - Used for occurrence during infancy and childhood, birth to 12 years.

**IN MIDDLE AGE** - Used for occurrence during middle age, 45-64 years.

**IN OLD AGE** - Used for occurrence during old age, 65 years+.

**IN PREGNANCY** - Used for occurrence during pregnancy, from conception through puerperium.

**IN UTERO** - Used for occurrence within the uterus from conception to birth.

## GEOGRAPHICS

GEOGRAPHIC NAMES can be used both as subject headings and subheadings. A complete list of the geographics appears in the alphabetic and tree structures (Category Z) of the Subject Heading List.

# DOCUMENT TYPES

---

Document types indicate the type of material indexed (e.g., review, biography), the presence of some sample form or data (e.g., exam questions, statistics), or the publication format (e.g., book, dissertation). Unless otherwise indicated Document Types were established prior to 1983. A complete list follows:

**ABSTRACT** (92) - indicates an abstract. For material about abstracting, see CINAHL main heading: **ABSTRACTING AND INDEXING**.

**ANECDOTE** - indicates a brief narrative often informal in tone.

**BIBLIOGRAPHY** - indicates presence of a substantive bibliography — i.e., a list of books, journal articles, AVs, etc., on a topic or by a specific author. For material about preparation of or use of bibliographies, see CINAHL main heading: **BIBLIOGRAPHY**.

**BIOGRAPHY** (85) - indicates a biography.

**BOOK\*** (85) - indicates a book.

**CARE PLAN** - indicates presence of a care plan — i.e., a plan developed to assure consistent care of an individual patient or for a specific disease. For material about preparation of or use of care plans see CINAHL main headings: **NURSING CARE PLANS** or **PATIENT CARE PLANS**.

**CASE STUDY** - indicates a review of a particular condition, disease, or administrative problem.

**CEU** (85) - indicates material which has been approved by a professional society for continuing education credit. May be dated or non-dated. CEU material will be double indexed under the main heading **EDUCATION, CONTINUING (CREDIT)** as well as under the appropriate subject terms.

**COMMENTARY** - indicates a commentary — i.e., a comment on a previously written article.

**COMPUTER PROGRAM** (86) - indicates material containing a written computer program. For material about computer programs, see CINAHL main heading: **SOFTWARE** or **SPECIFICS**.

**DISSERTATION\*** (90) - indicates a dissertation. For material about dissertations see CINAHL main heading: **THESES AND DISSERTATIONS**.

**EDITORIAL** - indicates an editorial.

**EXAM QUESTIONS** - indicates the presence of sample exam or CEU questions.

**FORMS** - indicates the presence of sample forms. For material about the preparation of or use of forms in general see CINAHL main heading: **DOCUMENTATION**.

**HISTORICAL MATERIAL** (92) - indicates material (or a portion thereof) which has been reprinted from an earlier work of historical interest.

**INTERVIEW** (85) - indicates an interview.

**JOURNAL\*** - indicates material published in a journal. For material about journals, see CINAHL main heading: **SERIAL PUBLICATIONS**.

**LETTER** (91) - indicates letters to the editor which are substantive in nature.

**NURSING DIAGNOSES** (88) - indicates material which contains nursing diagnoses as a substantive part of a care plan, case study, or in relation to the subject being discussed. For material about nursing diagnosis, see CINAHL main heading: **NURSING DIAGNOSIS**.

**OBITUARY** (85) - indicates an obituary.

**PAMPHLET** (85) - indicates a pamphlet.

**PICTORIAL** - indicates the presence of substantive photographs, pictures, or medical illustrations. Includes EEG and EKG leads.

**PROCEEDINGS** (92) - indicates material from conference proceedings.

**PROTOCOL** (84) - indicates the presence of a protocol — i.e., written plans specifying the methods to be followed in performing various procedures or in conducting research.

**QUESTIONNAIRE** - indicates the presence of a sample questionnaire. For material about the preparation of or use of questionnaires see CINAHL main heading: QUESTIONNAIRES.

**RESEARCH** - indicates a research study containing data collection, methodology, discussion of results, etc. For material on how to conduct research or the value of research, see specific CINAHL main headings, such as RESEARCH, NURSING, CLINICAL or RESEARCH, MEDICAL.

**RESPONSE** - indicates material written in response to a commentary.

**REVIEW** (88) - indicates a substantial review of the literature.

**SOFTWARE\*** (92) - indicates a piece of educational software. For material about software, see CINAHL main heading: SOFTWARE or specifics.

**STANDARDS** (92) - indicates a formal standard of practice or position paper issued by a professional organization. For material describing standards or discussing their importance, see CINAHL subheading /standards with appropriate main heading(s).

**STATISTICS** - indicates the presence of substantive statistical data applicable outside the context of a research study. For material about the collection or preparation or use of statistics see CINAHL main heading: STATISTICS.

**TABLES/CHARTS** (85) - indicates the presence of substantive tables and/or charts.

**TEACHING MATERIALS** (85) - indicates examples of various teaching/educational materials, primarily used for patient instruction.

\* Used in the online and CD-ROM databases only

# GUIDE *to* SUBJECT HEADING CHANGES

---

# NEW CINAHL SUBJECT HEADINGS

## *with* PREVIOUS INDEXING

---

These subject headings represent concepts that are new to CINAHL as well as concepts that were previously indexed under different (usually broader) CINAHL headings. If the heading in the "previously indexed under" column still exists, it is printed in upper case letters. If the heading has been deleted and is no longer a legitimate CINAHL term, it appears in lower case.

A8.796.214.44  
Year: 1992

Ability see **APTITUDE**

Ability Testing see **APTITUDE TESTS**

# ABNORMALITIES

C16.131 +  
Year: 1983

Congenital malformations of organs or parts. Consider also /abnormalities subheading. Do not use /chemically induced; prefer precoordinated heading **ABNORMALITIES, DRUG-INDUCED**.

x Birth Defects  
Congenital Defects  
Deformities  
XX **FETAL DISEASES**

# ABNORMALITIES, DRUG-INDUCED

C16.131.42 C21.613.276.131  
Year: 1983

Congenital abnormalities caused by medicinal substances or drugs of abuse taken by the mother or to which she is inadvertently exposed.

see also **TERATOGENS**

x Drug-Induced Abnormalities  
XX **MATERNAL-FETAL EXCHANGE TERATOGENS**

# ABNORMALITIES, MULTIPLE

C16.131.77 +  
Year: 1983

x Multiple Abnormalities

# ABNORMALITIES, RADIATION-INDUCED

C16.131.80 C21.866.733.31

\$G3.850.810.360.31

Year: 1988

Congenital changes in the morphology of organs produced by exposure to ionizing or non-ionizing radiation.

x Radiation-Induced Abnormalities

# ABO BLOOD-GROUP SYSTEM

D24.611.216.705.230.31 G4.610.241.31

G9.188.229.31

Year: 1988

Before 1988 see under **BLOOD GROUPS**.

Aborigines, Australian see **AUSTRALOID RACE**

# ABORTIFACIENT AGENTS

D7.131 +

Year: 1988

Chemical substances that interrupt pregnancy after implantation.

Before 1988 see under **CONTRACEPTIVE AGENTS**.

# ABORTION, CRIMINAL

I1.198.240.89 \$I1.880.735.191.91

Year: 1983

x Criminal Abortion  
Illegal Abortion

# ABORTION, INDUCED

E4.819.774.173

Year: 1983

# ABORTION, SPONTANEOUS

C13.703.39 +

Year: 1991

Up to 20th week of gestation. After 20th week use **PERINATAL DEATH**.

x Miscarriage

Abrasions and Contusions see **CONTUSIONS AND ABRASIONS**

# ABRUPTIO PLACENTAE

C13.703.420.78 C13.703.590.132

Premature separation of the normally implanted placenta.

see also **PLACENTA PRAEVIA**

XX **PLACENTA PRAEVIA**

# ABSCESS

C1.539.26 + C23.739.487.90

Abscess, Brain see **BRAIN ABSCESS**

Abscess, Cerebral see **BRAIN ABSCESS**

Abscess, Liver see **LIVER ABSCESS**

Abscess, Lung see **LUNG ABSCESS**

Abscess, Pelvic see **PELVIC ABSCESS**

Anesthesia, Caudal see **ANESTHESIA, EPIDURAL**

## ANESTHESIA, CONDUCTION

### ANESTHESIA, CONDUCTION

E3.155.86+  
Year: 1983

Insensibility caused by interrupting the sensory nerve conductivity of any region of the body: produced by 1) field block, the encircling of the operative field by means of injections of a local anesthetic or 2) nerve block, making injections in close proximity to the nerves supplying the area.

- x Anesthesia, Regional  
Conduction Anesthesia  
Regional Anesthesia

Anesthesia, Electric see  
**ELECTRONARCOSIS**

### ANESTHESIA, EPIDURAL

E3.155.86.131  
Year: 1983

Denotes the production of surgical analgesia by local anesthetics. That is, the epidural solution is concentrated enough to provide a complete anesthetic for specific surgical procedures.

- x Anesthesia, Caudal  
Caudal Anesthesia  
Epidural Anesthesia

### ANESTHESIA, EQUIPMENT AND SUPPLIES

\$E7.65

Year: 1992

Searchable electronically since 1983.

- x Gas Scavengers

### ANESTHESIA, GENERAL

E3.155.197+  
Year: 1983

Controlled state of depressed consciousness or unconsciousness accompanied by partial or complete loss of protective reflexes, including the ability to maintain an airway and respond purposefully to physical stimulation or verbal command. Produced by pharmacologic or nonpharmacologic methods, or a combination.

- x General Anesthesia

### ANESTHESIA, INDUCTION

F1.470.93 \$F3.126.56.90

Angitis see **VASCULITIS**

### ANGINA PECTORIS

C14.280.211.198+

The symptom of paroxysmal pain consequent to myocardial ischemia. Usually of distinctive character, location, and radiation, and provoked by a transient stressful situation during which the oxygen requirements of the myocardium exceed the capacity of the coronary circulation to supply it.

### ANGINA, UNSTABLE

C14.280.211.198.970

Year: 1991

Precordial pain at rest which may precede a myocardial infarction.

Before 1991 see under ANGINA PECTORIS.

- x Unstable Angina

Angioedema see **ANGIOEDEMA**

### ANGIOGRAPHY

E1.145.77+ E1.357.818.84+

Radiography of blood vessels after injection of a contrast medium. For general or unspecified angiography; prefer /radiography with specific blood vessels.

- x Arteriography
- XX BLOOD VESSELS

Angiography, Coronary see **CORONARY ANGIOGRAPHY**

### ANGIOGRAPHY, DIGITAL SUBTRACTION

E1.145.77.141 E1.357.818.84.80

E1.357.818.802.225

H1.671.606.799.484.802.225

Year: 1990

A method of delineating blood vessels by subtracting a tissue background image from an image of tissue plus intravascular contrast material that attenuates the x-ray photons. The background image is determined from a digitized image taken a few moments before injection of the contrast material. The resulting angiogram is a high-contrast image of the vessel. This subtraction technique allows extraction of a high-intensity signal from the superimposed background information. The image is thus the result of the differential absorption of x-rays by different tissues.

Before 1990 see under ANGIOGRAPHY.

- x Digital Subtraction Angiography  
Subtraction Angiography, Digital

### ANGIOEDEMA

C14.907.79 C17.174.948.56

C20.543.480.904.282

Year: 1992

Temporary edema suddenly appearing in areas of skin or mucous membrane and occasionally of the viscera, often associated with dermatographia, urticaria, erythema, and purpura, which may be of allergic, neurotic, or unknown origin.

Before 1992 see under URTICARIA.

Surface Markers

### ANTIGENS, VIRAL

D24.611.216.327

Year: 1988

Before 1988 see under ANTIGENS.

x Viral Antigens

### ANTIGUA

Z1.107.904.50

Year: 1984

Antihistaminics see **HISTAMINE  
ANTAGONISTS**

### ANTIHYPERTENSIVE AGENTS

D18.162+

Consider also HYPERTENSION/drug therapy.

### ANTIINFECTIVE AGENTS

D20+

Year: 1983

Consider also INFECTION/drug therapy or  
specifics.

### ANTIINFECTIVE AGENTS, LOCAL

D20.187+

Year: 1983

see also DISINFECTANTS

x Antiseptics

XX DERMATOLOGIC AGENTS

### ANTIINFECTIVE AGENTS, QUINOLONE

D20.220+ D20.237.50+

Year: 1990

Before 1990 see under ANTIINFECTIVE  
AGENTS.

x Quinolones

### ANTIINFECTIVE AGENTS, URINARY

D19.770.56 D20.237+

Year: 1983

Consider also URINARY TRACT  
INFECTIONS/drug therapy.

x Antiseptics, Urinary

### ANTIINFLAMMATORY AGENTS

D26.74+

Consider also INFLAMMATION/drug therapy.

XX FEVER

**ANTIINFLAMMATORY AGENTS,  
NON-STEROIDAL**

D14.73.290+ D26.74.75+

Year: 1988

Before 1988 see under ANTIINFLAMMATORY AGENTS.

x Non-Steroidal Antiinflammatory Agents  
NSAIDS

**ANTIINFLAMMATORY AGENTS,  
STEROIDAL**

D26.74.125+

Year: 1988

Before 1988 see under ANTIINFLAMMATORY AGENTS.

x Steroidal Antiinflammatory Agents

**ANTIINFLAMMATORY AGENTS, TOPICAL**

D26.74.148+ D26.368.99+

Year: 1983

Consider also INFLAMMATION/drug therapy.

Antileprotic Agents see **LEPROSTATIC AGENTS**

**ANTILIPEMIC AGENTS**

D10.162+

Year: 1983

Consider also HYPERLIPIDEMIA/drug therapy.

Antilirium see **PHYSOSTIGMINE**

Antilymphocyte Antibodies see **IMMUNOSUPPRESSIVE AGENTS**

Antilymphocyte Globulin see **IMMUNOSUPPRESSIVE AGENTS**

Antilymphocyte Serum see **IMMUNOSUPPRESSIVE AGENTS**

**ANTIMALARIALS**

### BLOOD VOLUME

G9.188.313 G9.330.612.214

Volume of circulating blood. It is the sum of the plasma volume and erythrocyte volume.

### BLOOD VOLUME DETERMINATION

E1.145.289  
Year: 1984

Method for determining the circulating blood volume by introducing a known quantity of foreign substance into the blood and determining its concentration some minutes later when thorough mixing has occurred. From these two values the blood volume can be calculated by dividing the quantity of injected material by its concentration in the blood at the time of uniform mixing. Generally expressed as cubic centimeters or liters per kilogram of body weight.

\$D15.236.122.251.250 \$D26.394.878.250  
Year: 1992

The purified, alkaloidal, extra-potent form of cocaine. It is smoked (free-based), injected intravenously, and orally ingested. Use of crack results in alterations in function of the cardiovascular system, the autonomic nervous system, the central nervous system, and the gastrointestinal system. There are concomitant psychological and social alterations as well. The slang term 'crack' was derived from the cracking sound made upon igniting of this form of cocaine for smoking. Before 1992 see under COCAINE; COCAINE DEPENDENCE.

### EMBOLIZATION, THERAPEUTIC

E2.520.360

Year: 1992

Method of hemostasis utilizing various agents such as Gelfoam, Silastic, metal, glass, or plastic pellets, autologous clot, fat, and muscle as emboli. Has been used in the treatment of spinal cord and cerebral arteriovenous malformations, renal arteriovenous fistulas, gastrointestinal bleeding, epistaxis, hypersplenism, certain highly vascular tumors, traumatic rupture of blood vessels, and control of operative hemorrhage.

Before 1992 see under HEMOSTATIC TECHNIQUES.

### EMBRYO

## FIBROMYALGIA

### FIBROMYALGIA

C5.651.324 C5.799.321  
Year: 1989

A common nonarticular rheumatic syndrome characterized generally by chronic musculoskeletal pain and diagnosed chiefly by the presence of multiple tender points at characteristic locations. Often associated with general symptoms, such as sleep disturbances, fatigue, stiffness, swelling, chronic headaches, and pain in neck and shoulders.

see also MYOFASCIAL PAIN SYNDROMES

### FLOW CYTOMETRY

\$E5.196.712.350 \$E5.909.262.350  
Year: 1991

Technique using an instrument system for making, processing, and displaying one or more measurements on individual cells obtained from a cell suspension. Cells are usually stained with one or more fluorescent dyes specific to cell components of interest, e.g., DNA, and fluorescence of each cell is measured as it rapidly transverse the excitation beam (laser or mercury arc lamp). Fluorescence provides a quantitative measure of various biochemical and biophysical properties of the cell.

### GASTROPLASTY

E4.765.485  
Year: 1991

Surgery of the stomach or lower esophagus  
to decrease the size of the stomach. The  
procedure is used mainly in the treatment of  
morbid obesity.

Before 1991 see under OBESITY/surgery;  
STOMACH/surgery; SURGICAL STAPLING.

### GASTROSCOPY

E1.184.340.350.425 E1.418.340.350.425  
Year: 1983

Endoscopic examination of the interior of the  
stomach. It is used to localize, identify, and  
photograph pathologic alterations, to obtain  
biopsy material and perform other surgical  
interventions, and for delivery of medication.

### GASTROSTOMY

E4.579.408 E4.765.496

Creation of an artificial external opening into  
the stomach for nutritional support or  
gastrointestinal compression.

## IMMUNOLOGIC TECHNIQUES

### IMMUNOLOGIC TECHNIQUES

E5.478+

Year: 1992

Diagnostic techniques involving the demonstration or measurement of an immune response including antibody production or assay, antigen-antibody reactions, serologic cross-reactivity, delayed hypersensitivity reactions, or heterogenetic responses.

Searchable electronically since 1983.

see also BLOOD GROUPING AND CROSSMATCHING; IMMUNOTHERAPY; SERODIAGNOSIS

XX IMMUNITY

### IMMUNOLOGIC TESTS

E1.223.495+

Year: 1987

Diagnostic techniques involving the demonstration or measurement of an immune response, including antibody production or assay, antigen-antibody reactions, serologic cross-reactivity, delayed hypersensitivity reactions, or heterogenetic responses.

Before 1987 see under IMMUNOLOGIC TECHNIQUES.

Immunomodulators see **IMMUNOLOGIC FACTORS**

### IMMUNOPROLIFERATIVE DISORDERS

C20.683+

Year: 1986

Disorders characterized by abnormal proliferation of primary cells of the immune system or by excessive production of immunoglobulins.

### IMMUNOPROTEINS

D12.776.124.486+

Year: 1988

Before 1988 see under BLOOD PROTEINS.

Immunoradiotherapy see **RADIOIMMUNOTHERAPY**

Immunoscintigraphy, Radiolabelled see **RADIOIMMUNODETECTION**

### IMMUNOSORBENT TECHNIQUES

E1.223.495.567.380 E5.478.567.380

Year: 1992

Techniques for removal by adsorption and subsequent elution of a specific antibody or antigen using an immunosorbent containing the homologous antigen or antibody.

Before 1992 see under ANTIGEN-ANTIBODY REACTIONS.

IMMUNOSUPPRESSION/methods.

x ELISA

Immunoadsorption

### IMMUNOSUPPRESSION

E2.95.520.450+ E5.478.610

A therapeutic technique: deliberate prevention or diminution of the host's response; do not confuse with IMMUNOSUPPRESSION (PHYSIOLOGY).

XX TRANSPLANTATION IMMUNOLOGY

Immunosuppression (Physiology) see **IMMUNOCOMPROMISED HOST**

### IMMUNOSUPPRESSIVE AGENTS

D22.569+

x Antilymphocyte Antibodies  
Antilymphocyte Globulin  
Antilymphocyte Serum

Consider also Specific Drug/therapeutic use.

x Vaccine Therapy

XX IMMUNOLOGIC TECHNIQUES

### IMPAIRED ADJUSTMENT (NURS DIAG)

\$P1.100.250.211.401

Year: 1989

The state in which an individual is unable to modify his/her life-style/behavior in a manner consistent with a change in health status.

x Adjustment, Impaired (Nurs Diag)

### IMPAIRED GAS EXCHANGE (NURS DIAG)

\$P1.300.600.555

Year: 1989

Disturbance in oxygen or carbon dioxide exchange in lungs or at cellular level.

x Gas Exchange, Impaired (Nurs Diag)

XX PULMONARY GAS EXCHANGE

### IMPAIRED HOME MAINTENANCE MANAGEMENT (NURS DIAG)

\$P1.600.109.609

Year: 1989

Inability to independently maintain a safe, growth-promoting immediate environment.

x Home Maintenance Management, Impaired (Nurs Diag)

Impaired Parents' Children see **CHILDREN OF IMPAIRED PARENTS**

### IMPAIRED PHYSICAL MOBILITY (NURS DIAG)

\$P1.600.137.513

Year: 1989

Limitation of ability for independent movement within the environment.

x Mobility, Impaired (Nurs Diag)

XX IMMOBILITY  
PHYSICAL MOBILITY

### IMPAIRED SKIN INTEGRITY (NURS DIAG)

\$P1.300.700.444.144

Year: 1989

Break in skin integrity.

x Skin Integrity, Impaired (Nurs Diag)

XX SKIN DISEASES

### IMPAIRED SOCIAL INTERACTION (NURS DIAG)

\$P1.800.154.444

Year: 1990

The state in which the individual experiences, or is at risk for experiencing, negative, insufficient, or unsatisfactory responses (outcomes) from interactions.

XX INTERPERSONAL RELATIONS  
SOCIAL ADJUSTMENT

### IMPAIRED SWALLOWING (NURS DIAG)

\$P1.600.275.452.552

Year: 1989

The state in which an individual has decreased ability to voluntarily pass fluids and/or solids from the mouth to the stomach.

x Swallowing, Impaired (Nurs Diag)

XX DEGLUTITION  
DEGLUTITION DISORDERS

### IMPAIRED TISSUE INTEGRITY (NURS DIAG)

\$P1.300.700.444+

Year: 1989

x Tissue Integrity, Impaired (Nurs Diag)

XX TISSUE

### IMPAIRED VERBAL COMMUNICATION

(NURS DIAG)

\$P1.200.444

Year: 1989

Reduced or absent ability to use language in human interaction.

x Communication, Verbal, Impaired (Nurs Diag)

Verbal Communication, Impaired (Nurs Diag)

XX COMMUNICATION  
COMMUNICATIVE DISORDERS  
LANGUAGE DISORDERS  
SPEECH DISORDERS

### IMPAIRMENT, HEALTH PROFESSIONAL

\$F2.784.700.415 \$G3.600.415

\$I1.880.600.583.485.532

\$N3.708.535.564.429

Year: 1983

The professional's inability to function with reasonable skill and safety to the patient due to disability; common causes include alcohol and drug abuse, mental illness, and senility.

x Professional Impairment

### IMPETIGO

Before 1991 see under INFANT FEEDING.

### INFANT FEEDING, SUPPLEMENTAL

\$E2.421.416.420  
Year: 1992  
Used for formula, sugar water, etc. given to babies along with breast milk.  
Before 1992 see under INFANT FEEDING.

### INFANT FORMULA

\$J1.341.449.576  
Year: 1989  
Before 1989 see under FOOD, FORMULATED/in infancy and childhood.  
see also BOTTLE FEEDING  
XX BOTTLE FEEDING

### INFANT, HIGH RISK

\$M1.471.392.520.510  
Year: 1987  
The newborn, regardless of gestational age or birth weight, who has a greater than average chance of morbidity or mortality because of conditions or circumstances that are superimposed on the normal course of events associated with birth and the adjustment to extrauterine existence. Newborn to 2 years.  
Before 1987 see under INFANT, LOW BIRTH WEIGHT; INFANT, NEWBORN, DISEASES; INFANT, PREMATURITY; NEONATAL CARE.  
x High Risk Infant  
Neonate, High Risk

### INFANT, LARGE FOR GESTATIONAL AGE

\$M1.471.392.520.520.420  
Year: 1989  
Neonates whose birth weights are greater than the 90th percentile for their gestational age. Consider also FETAL MACROSOMIA.  
Before 1989 see under INFANT, HIGH RISK; INFANT, POSTMATURITY  
x Large for Gestational Age Infant  
LGA

### INFANT, LOW BIRTH WEIGHT

M1.471.392.520.520.460 +  
Any neonate, regardless of gestational age, whose birth weight is less than 2,500 grams. A very low birth weight infant is one whose birth weight is less than 1,500 grams.  
x Low Birth Weight Infant  
XX FETAL GROWTH RETARDATION

### INFANT MORTALITY

\$G3.850.525.935.550.475  
\$I1.780.249.935.550.475  
N1.224.935.698.489  
Number of deaths of children under one year of age per 1,000 live births. Largely a statistical concept.  
see also PERINATAL DEATH  
x Mortality, Infant  
INFANT, NEWBORN

**INTEGRATED ACADEMIC INFORMATION  
MANAGEMENT SYSTEMS**

\$L1.220.300.300

Year: 1987

A concept, developed in 1983 under the aegis  
of and supplied by the National Library of  
Medicine, to provide professionals in  
academic health sciences centers and health  
sciences institutions with convenient access  
to an integrated and comprehensive network  
of knowledge. It addresses administrators,  
librarians, academic faculty, staff, students,  
clinicians, and researchers with applications  
to planning, managing, teaching, learning,  
clinical decision making, and research. It  
provides access to various types of  
databases (clinical, management, education,  
for example) as well as to research and  
bibliographic databases.

Before 1987 see under **MANAGEMENT  
INFORMATION SYSTEMS.**

x IAIMS  
XX INFORMATION MANAGEMENT

**INTEGRATED LIBRARY SYSTEMS**

\$L1.220.300.405.400 \$L1.453.639.500.400

\$L1.453.639.493

Year: 1983

x Document Delivery

Intermediate Care Facilities see **NURSING HOMES**

Interment see **BURIAL PRACTICES**

### INTERMITTENT CLAUDICATION

C14.907.137.126.669

A symptom complex characterized by leg pain and weakness brought on by walking, with the disappearance of the symptoms following a brief rest.

Intermittent Positive Pressure Breathing see **POSITIVE PRESSURE VENTILATION**

### INTERNAL CONSISTENCY

\$H1.770.644.100.711.391

Year: 1991

A type of reliability that is concerned with the extent to which the parts of an instrument 'hang together.'

Before 1991 see under RELIABILITY AND VALIDITY.

### INTERNAL MAMMARY ARTERY IMPLANTATION

E4.752.376.719.520 E4.920.490.630.510

Year: 1991

Indirect myocardial revascularization in which the internal mammary artery is implanted into the myocardium.

x Mammary Artery Implantation, Internal

International Career Mobility see **CAREER MOBILITY, INTERNATIONAL**

A3.492.411+

Intoxication, Alcoholic see **ALCOHOLIC INTOXICATION**

**INTRA-AORTIC BALLOON PUMPING**

E4.50.520

Year: 1987

Assisted circulation in which a pumping unit synchronized with the patient's electrocardiogram rapidly fills a balloon in the aorta with helium or carbon dioxide in early diastole and evacuates the balloon at the onset of systole. As the balloon inflates, it raises aortic diastolic pressure, and as it deflates, it lowers aortic systolic pressure. The result is a decrease in left ventricular work and increased myocardial and peripheral perfusion.

Before 1987 see under **ASSISTED CIRCULATION**.

## ISOMETRIC EXERCISES

\$E2.831.578.900.450 \$G11.427.394.380.450  
Year: 1983

A form of active exercise that increases muscle tension by applying pressure against stable resistance. This may be accomplished by opposing different muscles in the same individual, as by pressing the hands together or by making a limb push or pull against an immovable object. There is no joint movement and the length of the muscle remains unchanged, but muscle strength and tone are maintained or improved.

x **Exercises, Isometric**

## ISOTONIC EXERCISES

\$E2.831.578.900.475 \$G11.427.394.380.475

Year: 1992

A form of active exercise in which the muscle contracts and causes movement. Throughout the procedure there is no significant change in the resistance so that the force of the contraction remains constant. Such exercise greatly improves joint mobility and helps to improve muscle strength and tone.

Before 1992 see under EXERCISE.

## MENTAL RETARDATION

### MENTAL RETARDATION

C10.496+ F3.709.346+

Intellectual functioning that is 2 or more standard deviations below the mean (below 70), concurrent with deficits in adaptive behavior and manifested during the developmental period.

see also CHROMOSOME ABNORMALITIES; EDUCATION, SPECIAL; METABOLISM, INBORN ERRORS

x Mental Deficiency  
XX DEVELOPMENTAL DISABILITIES

Mental Status Examination see **DIAGNOSIS, PSYCHOSOCIAL**

### MENTORSHIP

\$F1.829.401.300 \$N4.450.677.425  
Year: 1987

An informal relationship between two people in which the person with the greater rank, experience, and/or expertise teaches, counsels, guides, and helps the other to develop both professionally and personally.

Before 1987 see under

INTRAPROFESSIONAL RELATIONS.

### MEPERIDINE

XX INFARCTION

### MYOCARDIAL REPERFUSION

E4.752.700.600 E5.680.730.600  
Year: 1990

Generally, restoration of blood supply to heart tissue which is ischemic due to decrease in normal blood supply. The decrease may result from any source including atherosclerotic obstruction, narrowing of the artery, or surgical clamping. Reperfusion can be induced to treat ischemia. Methods include chemical dissolution of an occluding thrombus, administration of vasodilator drugs, angioplasty, catheterization, and artery bypass graft surgery. However, it is thought that reperfusion can itself further damage the ischemic tissue, causing MYOCARDIAL REPERFUSION INJURY.

x Reperfusion, Myocardial

### MYOCARDIAL REPERFUSION INJURY

C14.280.600.615 C14.907.553.700.600  
C23.814.763.530  
Year: 1991

Functional, metabolic, or structural changes in ischemic heart muscle thought to result from REPERFUSION to the ischemic areas. Changes can be fatal to muscle cells and may include edema with explosive cell swelling and disintegration, sarcolemma disruption, fragmentation of mitochondria, contraction band necrosis, enzyme washout, and calcium overload. Other damage may include hemorrhage and ventricular arrhythmias. One possible mechanism of damage is thought to be oxygen free radicals. Treatment currently includes the introduction of scavengers of oxygen free radicals, and injury is thought to be prevented by warm blood cardioplegic infusion prior to reperfusion.

Before 1991 see under FIBRINOLYTIC AGENTS/adverse effects; MYOCARDIAL REPERFUSION/adverse effects.

Nursing Philosophy see **PHILOSOPHY, NURSING**

**NURSING PRACTICE**  
\$N4.450.758.500 +  
Year: 1989  
Practice based on scientific principles, established standards of care, and the nursing process. Includes all areas of nursing services, e.g. administration, education, research, and care. Do not use /economics; prefer NURSING CARE/economics.  
Before 1989 see under NURSING AS A PROFESSION; NURSING CARE.

Nursing Practice Acts see **NURSE PRACTICE ACTS**

Nursing Practice, Advanced see **ADVANCED NURSING PRACTICE**

Nursing Practice, Differentiated see **DIFFERENTIATED NURSING PRACTICE**

**NURSING PRACTICE, RESEARCH-BASED**  
\$N4.450.758.500.504  
Year: 1992

Searchable electronically since 1983.

x Research Based Nursing Practice  
XX RESEARCH, NURSING, CLINICAL

**NURSING PRACTICE, THEORY-BASED**  
\$N4.450.758.500.704  
Year: 1992  
Searchable electronically since 1983.  
x Theory-Based Nursing Practice

Nursing, Private Duty see **PRIVATE DUTY NURSING**

**NURSING PROCESS**  
\$N4.592.508 +  
Includes nursing assessment, nursing diagnosis, and nursing intervention. Do not confuse with NURSING AS A PROFESSION, NURSING CARE (the patient), or NURSING SERVICE (the department).

## NURSING PROTOCOLS

### NURSING PROTOCOLS

\$N4.592.808.518+

Year: 1983

Written plans specifying the procedure to be followed in giving a particular examination, in conducting research, or in providing care for a particular condition. Entered here are materials on the preparation and use of nursing protocols; for nursing protocols on a specific subject see appropriate subject heading and look for the descriptor (protocol) in parentheses.

x Protocols, Nursing

### NURSING RECORDS

**PARENTING**

F1.829.263.370.310  
Year: 1989  
Performing the role of a parent by caregiving, nurturance, and protection of the child by a natural or substitute parent. The parent supports the child by exercising authority and through empathic, consistent, and appropriate behavior in response to the child's needs. **PARENTING** differs from **CHILD REARING** in that in child rearing the emphasis is on the act of training or bringing up the children and on the interaction between the parent and child while **PARENTING** emphasizes the responsibility and qualities of exemplary behavior of the parent.  
Before 1989 see under **PARENTS; PARENT-CHILD RELATIONS**.

Year: 1991

A 'postpolio' syndrome characterized by new neuromuscular symptoms, including muscle weakness, that develops years after recovery from poliomyelitis. The symptoms may vary from simple nonprogressive deterioration of function, with joint pain, fatigue, and subsequent stabilization, to atypical forms of spinal muscular dystrophy. The new, slowly progressive muscle weakness may occur in muscles that were previously affected by polio and recovered or in muscles that were clinically unaffected by the acute disease.

# SEASONAL AFFECTIVE DISORDER

\$F3.709.438.100.705  
Year: 1992

A syndrome characterized by depressions that recur annually at the same time each year, usually during the winter months. Symptoms include irritability, anxiety, decreased energy, increased appetite (carbohydrate cravings), increased duration of sleep, and weight gain. Seasonal affective disorder, also known as SAD, may be treated by daily exposure to bright artificial lights (PHOTOTHERAPY) during the season of recurrence.

Searchable electronically since 1983.

**TREATMENT REFUSAL**

F1.145.76.347.785 \$F1.829.92.380.785  
Year: 1991

Refusal of a person to accept medical or psychiatric treatment or his unwillingness to comply with the physician's instructions or prescribed regimens. In the case of a legally incompetent person, the concept may include a third party authorized to make decisions on his behalf. Differentiate from **REFUSAL TO TREAT** which originates with the health professional, not the patient.

Before 1991 see under **PATIENT COMPLIANCE**.
